

IP-TV Set-Top Box

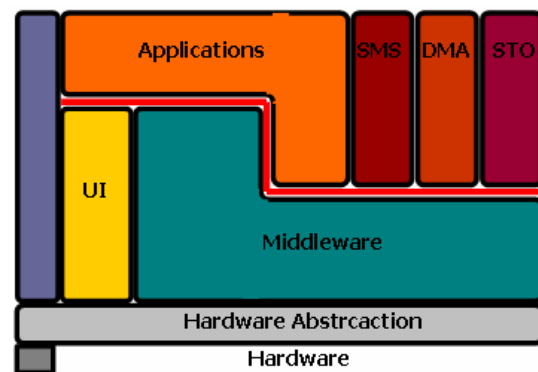

- Develop features with added value for your customers
- Step ahead of reference design solutions
- Smooth integration into the network infrastructure
- Future proof extension blocks in hard- and software
- Consultation for system integration

Delivering an IPTV solution is more than the addition of a few pieces of equipment and software into an existing network. From head-end over middleware up to home networks and set-top boxes, including the objectives of VOD servers, content management applications and conditional access/ DRM, these knowledge areas are relatively new to traditional Telco operators. The IPTV race has just begun...

IPTV System

The key to become a winner in the IPTV race is to anticipate market developments and to establish diversification from competitors by providing added values. To achieve this, re-usable, cost optimized and flexible hardware and software, innovative architectures are necessary.

Software Building Blocks

StreamUnlimited Engineering GmbH

We connect your products

StreamUnlimited can provide you with profound system knowledge of IP based TV solutions to support you in choosing key component suppliers, defining end-to-end solutions and creating individual services to increase the added value of your solution.

There's also experience present in product development of home network entertainment devices that makes it possible to develop connected products (hardware and software for set-top boxes) that are future proof and tailor-made for your requirements.

- **Storage:** Integrate mass storage solutions into the IPTV STB concept
- **Quality:** Add HDTV decoding capabilities, can be combined with storage solutions to make up a premium STB
- **Hybrid:** Enable satellite, terrestrial or cable reception in your platform concept for hybrid solutions
- **Mobile:** A useful combination is to link to mobile devices like cell phones and portable media players and transfer dedicated contents
- **Home network:** extend the STB with digital media adapter and/or server functionality to access audio- and video contents throughout your home

StreamUnlimited is your partner for making your IPTV solution a long-term success!

The *StreamUnlimited* advantages: same time zone, transparent progress of projects, reliable, same culture, same language, innovation power, on-site support, customer intimacy, flexible and fast startup of projects, market know how
