

StreamUnlimited

Wireless Design House Partner of
Murata Manufacturing Co., Ltd.

Wireless Design-In Support

Murata and StreamUnlimited have established a cooperation for Wi-Fi and Bluetooth modules. This cooperation provides our mutual customers a wireless integration in a professional, time and cost effective way. StreamUnlimited is an integrated engineering house focusing on innovative and quality embedded products. We have high level competences in Connectivity and User Interface Technology, powered by a strong background in Audio and Video. We provide development and integration services to our customers.

Services

- Development, integration, support for embedded systems
- Reference and application design
- Driver porting, adaptation, optimization, feature enhancements
- Integration into any OS
- Support for all HW/SW platforms
- StreamConnect - StreamUnlimited's connection manager
- Low Power
- Roaming
- CCX extensions

Wi-Fi

Wi-Fi is the wireless local area network (LAN) technology based on the IEEE 802.11 standards. StreamUnlimited provides wireless connectivity for embedded systems and consumer applications. We have a vast experience in Wi-Fi and can take care of the complete development of your Wi-Fi products, or support your activities „where needed“.

Bluetooth

Bluetooth is an open wireless protocol for exchanging data over short distances from fixed and mobile devices, creating a Personal Area Network (PAN). A variety of communication profiles exist and every profile requires a specific integration into the device's SW application, UI and set-up. We also support the emerging Bluetooth Low Energy standard.
