

Gain insight into your customer usage across their connected devices - such as playback time, services used and diagnostic informations.

Potential Applications

- ▶ Identify usage patterns and adjust your marketing strategy accordingly
- ▶ Monitor device performance and make improvements to enhance user experience
- ▶ Discover which features are most popular among your users and prioritize development accordingly
- ▶ Visibility of preferred end-user music service enables refinement of specification
- ▶ Playback time shows real-time usage and device value
- ▶ Diagnostics - issue identification and reporting for technical analysis and feedback
- ▶ Track overall usage data across our portfolio of connected devices

Key Points

- ▶ StreamAnalytics offers detailed usage analysis, including preferred music services, operating issues, and diagnostics extension.
- ▶ Know how many devices are connected and how they're being used in the field.
- ▶ Automatically generated reports are fully customizable to fit your needs.
- ▶ StreamAnalytics data can be easily integrated into third-party analytic engines for deeper insights.
