

With **StreamThings**, our modular edge IoT stack, you can control your devices with various ecosystems, including voice assistants, and automate modern smart integration environments. Our market-leading solution offers seamless device connection to all industry-standard systems and can even act as a bridge between those, making it the perfect choice for brands looking to stay ahead of the competition. And with an optional cloud component, you'll have even more deployment and processing options to take advantage of.

### Advantages

- ▶ Plugin architecture enables the simple addition of any other ecosystem
- ▶ Extendable via the StreamThings local rule and script engines to meet individual product development requirements
- ▶ Cost-effective and optimised time-to-market, with OTA update availability

### Edge Voice Assistant Extension

A local Edge Voice assistant enables complete product control and smart integration with or without a cloud connection. StreamThings serves as an **edge skills engine** linking commands to any IoT protocol. Even multi-voice products in combination with cloud-based solutions are supported. The Wake word can be fully customized.

### Smart Integration Use Cases

- ▶ **Residential;** integrate an audio device into a smart home environment and use it to control lights, music playback, and pre-configured scenes.
- ▶ **Healthcare;** The custom Edge Voice Assistant is designed to provide quality remote health check-ups, emergency assistance, and smart home control.
- ▶ **Retail;** An intelligent all-in-one solution for customer-centric ambiance creation for increased customer retention and profitability.
- ▶ **Industrial;** Control production line equipment by integrating local, customized voice assistant functionality or extend your stack with additional protocol support.

**StreamUnlimited**, founded in 2005, is a supplier of software solutions and hardware modules for connected audio and IoT products, with over 120 employees at office locations in Vienna, Bratislava, Iasi, Shenzhen, Japan and Santa Clara, CA. As the de facto global system integrator offering its own IP and engineering services, StreamUnlimited development partnerships include all major semiconductor companies and technology providers in the consumer electronics and IoT channel. StreamUnlimited works with a global cross-section of high-end audio, CEDIA-channel, premium and mainstream consumer electronics and smart home manufacturers.
